

SAFE STRIP

eco-friendly remover

Gemini Safe Strip is an eco-friendly remover that removes existing penetrating stains without the harmful toxic effects.

Safe Strip is easy to use and will provide a quick and effective solution to getting your exterior wood ready for a NEW finish!

- New Application Technology Allows Pressure Washer Injection
- Removes Oil-Based And Water - Based Semi Transparent Stains And Sealers
- Restores Weathered Wood To Natural Color
- 100% Biodegradable - Will Not Harm Plants Or Pets
- Does Not Contain Chlorine Bleach That May Damage Wood
- Use On All Exterior Wood Surfaces Including Decks, Fences And Fascia

**WHY JUST STAIN...
...WHEN YOU CAN PRESERVE!**

TWP® is a EPA registered wood preservative which prevents structural damage and wood decay on exterior above ground wood surfaces such as untreated or previously treated fencing, decking, wood siding, log homes and roofing. TWP® resists water absorption that causes warping, cracking and splitting as well as preventing freeze damage in colder climates.

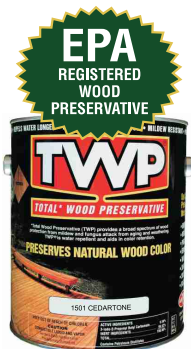

TWP® will keep your wood beautiful, fresh and looking new longer. The ease of application and maintenance will allow you to enjoy your investment for years to come.

TWP® Total Wood Preservative:

- Beautifies & Preserves
- Repels Water
- Prevents Wood Rot
- Stops U.V. Damage
- Easy to Apply

TWP® is Ideal for These Applications:

- Log Homes
- Wood Fencing
- Decking
- Roofing & Siding

TWP® is a registered trademark of AMTECO Inc.

Make Restoring Your
Exterior Wood...

...EASY!

With the Gemini Family
of Exterior Wood
Restoration Products!

Make it **EASY!** With the Gemini Family of Exterior Wood Restoration Products.

Are you ready to bring your exterior wood back to life!

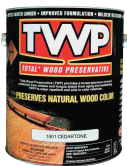

Weather and time can make exterior wood look dingy and gray well before it's replacement time is due. With Gemini's family of exterior wood restoration products you can remove all that grunge and film and re-finish your wood back to looking like NEW!

Restore-A-Deck Cleaner and Brightener system is a powerful "eco-friendly" two part restoration process. First Restore-A-Deck Cleaner deep cleans your wood, then Restore-A-Deck Brightener follows this powerful cleansing with a brightening formula that is actually designed to lower ph, but significantly brightens the wood for color brilliance following the application of stain as a final process.

For decks or other exterior wood that need an eco-friendly removal of a previous finish Gemini offers an ideal solution in "Safe-Strip" a powerful (non-toxic) remover that will cut through an existing finish to reveal the original wood. Once "safe-stripped", the powerful combo of Restore-A-Deck Cleaner and Brightener will completely prepare your exterior wood to re-finish like new.

Finally once you have prepared your exterior wood there is no better choice for the final finish than Gemini's TWP® exterior wood preservative. TWP® is the standard for excellence in exterior wood finishing and offers you a wide variety of color options in an easy to apply formula.

TWP® is a registered trademark of AMTECO

EASY, Two Part Restoration Process!

STEP 1

Restore-A-Deck Professional Grade Eco-Friendly Cleaner

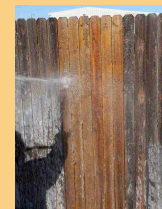

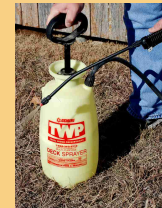

APPLICATION INSTRUCTIONS

Step #1

Mix 6 oz. of Restore-A-Deck professional grade eco-friendly cleaner per gallon of warm water in a pump-up sprayer until all crystals have completely dissolved.

For wood where an existing finish needs to be removed we recommend Gemini Safe Strip remover be used prior to Restore-A-Deck cleansing and brightening.

Coverage: Up to 1000 sq. ft.

STEP 2

Restore-A-Deck Professional Grade Eco-Friendly Brightener

APPLICATION INSTRUCTIONS

Step 1:

Mix 6 oz. of Restore-A-Deck professional grade eco-friendly brightener per gallon of warm water in a pump-up sprayer until all crystals have completely dissolved. For a five gallon mix simply pour entire container contents into a five-gallon pail and mix completely with five gallons of warm water.

Coverage: Up to 1000 sq. ft.

Step 2:

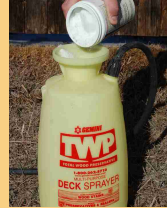

Apply directly to surface with a pump-up sprayer and the wood will brighten or become lighter than wood after the Step #1 Cleaner was applied.

Step 3:

After the entire surface has been treated, simply rinse surface with a garden hose

Finished Product

Let wood dry for 48 hours before applying a wood preservative or finishing product.
